PROFESSIONAL SUMMARY

Full-Stack Developer specializing in building scalable, responsive web applications using React.js, Next.js, Express, and MongoDB. Proven track record in implementing end-to-end software solutions, from robust RESTful APIs and secure authentication systems to modern, intuitive user interfaces. Passionate about translating complex UI/UX designs into high-performing, production-ready applications while contributing to collaborative, growth-oriented engineering teams.

TECHNICAL SKILLS

- **Frontend:** React.js, Next.js (App Router), JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, HeroUI, DaisyUI, Motion (Framer Motion), Responsive Web Design.
- **Backend & Database:** Node.js, Express.js, RESTful API Development, MongoDB, MongoDB Atlas.
- **State & Data Management:** Context API, REST API Integration, Server-Side Pagination, Fetch API, Form Handling.
- **Auth & Security:** Better Auth, OAuth 2.0 (Google, GitHub), JWT (JSON Web Tokens), Role-Based Access Control (RBAC), Stripe Payments.
- **Tools & Deployment:** Git, GitHub, Postman, npm, Vercel, Netlify, Vite.
- **AI-Assisted Workflow:** GitHub Copilot, Prompt Engineering, AI-Assisted Debugging & Code Optimization, ChatGPT, Claude.

FEATURED PROJECTS

1. RecipeHub — Full-Stack Recipe Sharing Platform | [Live Demo](#) | [Client Code](#) | [Server Code](#)

- Designed and built a full-stack recipe platform featuring server-side pagination, light/dark mode, and interactive community recipe discovery.
- Implemented strict Role-Based Access Control (RBAC) across Normal, Premium, and Admin users, enforcing a 2-recipe upload quota for free tier accounts.
- Integrated Stripe Checkout for seamless monetization, supporting single-recipe purchases and recurring Premium membership upgrades with instant profile badge updates.
- Developed an administrative management panel allowing admins to review content reports, manage user access (block/unblock), and curate featured recipes.
- **Tech Stack:** Next.js 16, React 19, Tailwind CSS v4, HeroUI, Better Auth, Stripe, MongoDB, Motion, Lucide React, Vercel.

2. MediQueue — Full-Stack Tutor Booking Platform | [Live Demo](#) | [Client Code](#) | [Server Code](#)

- Built a comprehensive tutor directory featuring real-time search functionality by name and interactive date-range availability filters with visual status badges.
- Engineered authenticated user dashboards enabling students to track scheduled sessions, manage custom tutor listings, and execute instant session cancellations.
- Secured platform authentication using Better Auth supporting validated email/password credentials and one-click Google OAuth 2.0 integration.
- **Tech Stack:** Next.js 16, React 19, Tailwind CSS v4, DaisyUI, HeroUI, Better Auth, MongoDB, Next-Themes, Vercel.

3. DigiTools Platform — Digital Products & Subscription Platform | [Live Demo](#) | [Client Code](#)

- Developed a fast, single-page web application featuring a dynamic tabbed navigation interface for seamless toggling between product catalogs and cart state.
- Built interactive shopping cart controls including item selection, quantity updates, real-time total price calculations, and toast feedback via React Toastify.
- Designed a modern, fully responsive user interface utilizing DaisyUI and a cohesive purple gradient design system.
- **Tech Stack:** React 19, Vite, Tailwind CSS v4, DaisyUI, React Toastify, Netlify.

EDUCATION

Diploma in Computer Science & Technology (2023 – 2026)

Feni Government Polytechnic Institute – Feni, Chittagong, Bangladesh.

LEADERSHIP & EXTRA-CURRICULAR

- **Web Development Mentor** – Feni Polytechnic Institute Computer Club (Guided students in modern frontend web development).
- **4th Place Winner** – Asset Skills & Innovation Competition (2025).

LANGUAGES

Bengali: Native | **English:** Professional Working | **Hindi:** Fluent | **Urdu:** Intermediate.
